**Date: 26<sup>th</sup> August 2020**

**Sub: Installation of SSL Certificates in all Government Websites.**

1. This has reference to letter no. 1001/2020 dated 29/07/2020 received from Hon'ble Member of Parliament (Lok Sabha) Smt Shardaben Anilbhai Patel regarding Installation of SSL Certificates in Government websites.
2. Hon'ble Member of Parliament has raised concern about most government websites being run either without SSL Certificates or with improperly configured/ expired certificates. SSL certificates not only increase the privacy and security but at the same time the padlock in the address bar in the browser indicates that the website is secure and increases the trust of citizens on government websites.
3. All the government websites should have valid SSL certificates which are also recognized by the browsers. In view of this, NIC may facilitate government ministries and departments in installing valid SSL certificates on their websites.

This issues with the approval of Secretary, MeitY.
